

FIG. 1

FIG. 1 is a schematic diagram of a system for processing a material. The system includes a large container 11. Inside the container, there is a material 12. A rotating drum 14 is positioned within the container, with a dashed circle 3 indicating its rotation. A nozzle 22 is directed at the material 12, with a spray 18 emanating from it. A handle 20 is attached to the nozzle. A cross-section 23 of the material 12 is shown, with a central core 2 and a surrounding layer 23. A dashed line 16 is also indicated.
